

User Manual

Track-Mount Kit

The Track-Mount Kit is a specially designed accessory for permanent outdoor lights, enabling a clean, professional, and durable installation along eaves, soffits, or straight edges. By housing your light strings in sturdy tracks, it enhances both aesthetics and protection.

Compatibility

This track kit is compatible with the following light models:

Govee Permanent Outdoor Lights (1st Generation, 2nd Generation, Elite)
ASAHOM S1080 Series Permanent Outdoor Lights

 Please make sure to check the model of your lights before installation. Using the track kit with non-compatible products may result in improper fit or damage, which is not covered under warranty.

Key Features

Professional Finish – Hides wires and bases for a seamless look

Enhanced Protection – Shields lights from physical impact and weather exposure

Modular Design – Tracks can be cut or joined to fit any length

Quick Installation – Lights use adhesive backing for secure placement

Inside Elbows	x4

T-Connectors	x4
Flat Elbows	x4
Couplings	x4
End Caps	x4
Screws Pack	x8
Extra Lamp Holders	x6

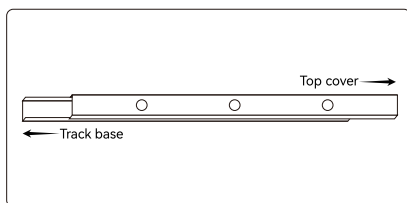

Installation Guide

STEP 1 Prepare the Mounting Surface

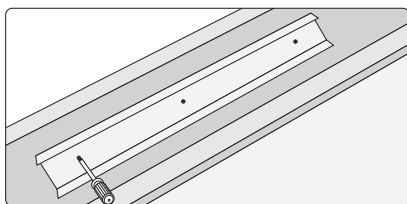

Ensure the eave or surface is clean, dry, and flat for a secure installation.

STEP 2 Slide to Separate the Track Covers

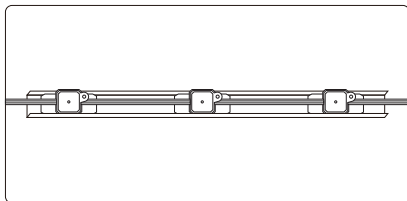

STEP 3 Position and Mount the Track Base

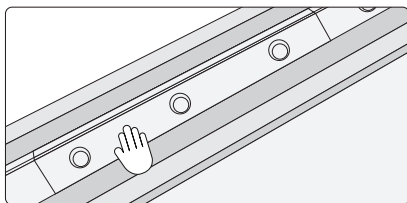

Align the track bases along your planned installation path.
Secure them firmly using the provided screws for long-term stability.

STEP 4 Attach the Lights to the Top Cover

Mount the light string onto the track's top cover.

STEP 5 Snap the Top Cover onto the Base

Place the assembled top cover (with lights) over the track base. Press down until you hear a clear click sound, indicating it is securely locked in place.

Recommended Usage Scenarios

- Long straight runs along eaves or fences
- Modern homes seeking a minimalist aesthetic
- Areas prone to wind, debris, or physical impact
